

measureQuick® Training Resources

In-Person Training Across The Country Through Upskill HVAC

mQ Approved Training Labs

measureQuick approved training facilities

- Full HVAC systems replicating real-world installations
- Complete electrical access points for meter training
- Manufacturer documentation at every training station
- Filter grills and adjustable dampers for scenarios
- CO detectors and posted safety procedures

Upskill HVAC Curriculum

Official measureQuick affiliated training organization

- Next-generation HVAC training for modern technicians
- Expert instructors with unparalleled industry expertise
- Partnered with ACCA, NCI, BPI & major manufacturers
- Hands-on workshops in small-group environment
- Compliance, quality assurance & safety training included

Courses Built for Field Success

Every course combines classroom instruction with live equipment practice. Small class sizes ensure personalized attention from industry-leading instructors at certified training labs.

MANUAL J LIDAR & MQ FUNDAMENTALS

- Complete load calcs in minutes
- Generate professional 3D models
- Create scientifically-backed proposals
- Justify premium pricing with data
- Win jobs against low-ballers

AC & HEAT PUMP COMMISSIONING

- Profile systems in seconds
- Master probe placement for all modes
- Access just-in-time education instantly
- Generate professional customer reports
- Support junior techs remotely

STATIC PRESSURE & AIRFLOW MASTERY

- Diagnose airflow issues in minutes
- Master static pressure profiling science
- Get exact SCFM with TrueFlow
- Find problems others miss
- Reduce callbacks dramatically

ACCA QI5 CERTIFICATION

- Master VSP and VEO workflows
- Learn critical test points thoroughly
- Measure airflow with TEC TrueFlow
- Balance new and altered systems
- Generate VSP/VEO certificates through mQ

THE SCIENCE BEHIND MEASUREQUICK

- Heating, cooling, and refrigerant fundamentals
- Thermodynamics and efficiency measurement
- Airflow design and static profiling
- Theory with hands-on lab application
- Open conversation with Jim Bergmann

TRAIN THE TRAINER & CHAMPION

- Master Install and Service workflows
- Utilize AI Profiler and streaming
- Communicate Vitals reports effectively
- Hands-on TrueFlow and static demos
- Guide techs with just-in-time education

Training That Comes To You!

Get your entire team trained without disrupting operations or coordinating out-of-town travel through on-site packages. Prices include travel for 1 instructor at your facilities.

PACKAGE 1: \$4,500 Quick Start

Jump into measureQuick with focused, 1 day training on your choice of topic. Whether it's AC & heat pumps, gas furnaces, or experiencing a ride along, you'll leave ready to use the platform.

PACKAGE 2: \$6,000 Dual Focus

2 days of intensive training tailored to your needs. Pick two areas (AC & heat pump workflows, gas furnace procedures, or field application) to transform how your team approaches HVAC diagnostics.

PACKAGE 3: \$7,500 Full Immersion

3 days covering everything measureQuick offers for residential HVAC. You'll gain expertise in AC & heat pump systems, master gas furnace diagnostics, and spend a day in the field learning best practices.

One trained technician pays for an entire team's training in reduced callbacks alone. Our courses deliver immediate, measurable skills your team can apply on their next service call. Hands-on. Data-driven. Field-ready.
